## Volume 5: How to judge whether content is illegal or not?

### The Illegal Content Judgements Guidance (ICJG)

#### Question 49:

i) Do you agree with our proposals, including the detail of the drafting?

Response:

Our response refers to section A9 of Annex 10: Online Safety Guidance on Judgement for Illegal Content.

We welcome the fact that the term 'prostitute' is only used when necessary and that 'sex worker' is used where statute is not being referenced. This is in line with how women we support prefer to be referred to. We also welcome the acknowledgement that some adults engage in sex work of their own free will and that content should not be taken down if it will make those working voluntarily in the industry less safe.

The level of detail is clear and helpful but there are a few points of clarification which would be useful.

It would be beneficial to provide guidance on the difference between encouraging someone to engage in sex work and offering advice on how to engage in sex work safely. For example, we have seen posts on sex work forums where someone states that they are considering engaging in sex work for the first time and people may comment offering support and advice. The majority would not stand to gain from them becoming a sex worker, and therefore would not be committing an illegal act, but it may be helpful to explicitly clarify this.

Section A9.13 refers to the fact that services other than those aimed primarily or solely for the selling of sexual services are likely to be viewed by those who are not already prostitutes, and therefore it is likely that illegal content could be viewed by a potential victim. It would be helpful to clarify where classified ad sites with sections dedicated to this purpose would fall within this distinction. For example, Vivastreet is not just used for selling sex but there are sections of the site where it is more likely that those viewing content are there to either buy or sell sex.

We recommend referring to the Sexual Trafficking Identification Matrix as a mechanism for identifying indicators of sexual exploitation within ads.

ii) What are the underlying arguments and evidence that inform your view?

Response:

Our response is based on our years of experience providing support to women who have experienced sexual exploitation as well as women engaging in sex work and survival sex (the provision of sexual services in order to meet survival needs). This includes our Netreach project, which provides outreach support to women advertising sexual services online as well as identifying those who may be experiencing sexual exploitation and engaging with website providers to promote safety measures.

It is our experience that several people (primarily men) looking to sexually exploit women advertise in a way that is deliberately vague so as to avoid their posts being removed. Many of these ads would struggle to pass the test of reasonable grounds to infer illegal activity, but to

those working in this field are highly likely to be exploitative, therefore we have not recommended their inclusion in the guidance but have shared examples below:

- “Xmas cash in hand available this week for ladies”
- “So this is open to 2 females, rent free. In exchange, you will be responsible for keeping the house clean and me ‘satisfied’.”
- “Rent and all bills negotiable for the right tenant. Females only.”
- “Any girls looking for cheap accommodation in return for help around the place. Pic and contact details please.”

Independent sex workers tell us that advertising online is a far safer option for them as it allows them to vet clients and they do not fall foul of soliciting laws while engaging in street sex work. It is important that they are still able to obtain clients safely online.

While efforts need to be taken to address sexual exploitation online, caution also needs to be exercised so as not to drive the practice underground. Services such as Netreach can only offer support to women experiencing sexual exploitation if they can access them via online platforms.
