Volume 5: How to judge whether content is illegal or not?

The Illegal Content Judgements Guidance (ICJG)

Question 49:

i) Do you agree with our proposals, including the detail of the drafting?

Response: In respect of false communications, to ensure freedom of speech we believe that the guidance should state that there is no expectation that information issued by one actor or group of aligned actors should be given more than 25% weight in reaching a decision about the likely accuracy or otherwise of the description of a particular situation or particular facts or particular alleged information.

ii) What are the underlying arguments and evidence that inform your view?

Response: It is possible for a large actor, or a coordinated group of actors, to dominate the news cycle and give the impression that particular facts are true when that is not the case.

iii) Is this response confidential? (if yes, please specify which part(s) are confidential)

Response: Not Confidential

Response:

Question 51:

i) What do you think of our assessment of what information is reasonably available and relevant to illegal content judgements?

Response: In respect of false communications, in order that it is not possible for a large actor or group of actors acting in concert to exercise excessive influence over public debate and to suppress free speech we believe that the guidance should state that no party is expected to give more than 25% weight to information coming from, or likely to come from, one source, or a group of sources, under the control of a single actor or an aligned group of actors.

For example, the Horizon Post Office case showed that governments can get things wrong and that can result in harm. Therefore, the fact that the majority of statements of alleged facts and information in the public domain may be coming from the government directly, or indirectly by

means of any government funded bodies or research, or by the press largely repeating government statements or those of government funded bodies, should not lead to an assumption that the government's position, or those of the aligned actors, is correct, or place any sense of obligation legally or morally on private companies to assume that those statements are correct.
