Question	Your response
Question 1: Do you agree with our proposed additional technical conditions for using 2.6 GHz D2D services in order to protect 2.7-3.1 GHz radars?	Y The fundamental principle of allocating part of the 'noise budget' to the D2D operator is a sound approach mathematically which if properly implemented should provide adequate mitigation.
Question 2: Do you have any comments relating to the proposed licence conditions?	Y NATS has evidence that the current coordination process is not working well and that whilst MNOs are usually aware of their obligations their sub-contractors are often not. NATS is concerned that the inclusion of additional parties into the process in the form of D2D operators will add additional complexity, to the point of making the existing provisions unworkable. Consideration should be given to whether to exclude the 2.GHz from this proposal or to significantly strengthen the coordination arrangement.
Question 3: Do you have any comments on our drafting of the Proposed Regulations? Please give reasons supported by evidence for your views.	N
Question 4: Do you have any comments relating to any other matter in this Notice of Proposed Regulations?	N
