NOTIFICATION OF PROPOSALS UNDER SECTIONS 48A AND 80A OF THE COMMUNICATIONS ACT 2003 (“Notification”)

Proposals for identifying markets, making market power determinations and setting and revoking SMP services conditions in relation to wholesale call termination and applying to BT and specified communications providers under section 45 of the Communications Act 2003.

Background

1. On 30 November 2017, Ofcom published a statement entitled “*Narrowband Market Review: Statement*” (the “**2017 NMR Statement**”). The 2017 NMR Statement set out Ofcom’s conclusions on its review of narrowband markets including the wholesale call origination and wholesale call termination markets by identifying markets, making certain market determinations and setting SMP conditions (including charge control conditions).
2. At Annexes 9 and 10 of the 2017 NMR Statement, Ofcom published a notification under section 48(1) of the Act containing its market identifications, market power determinations and the setting of SMP conditions and directions to be applied to BT, KCOM and other communications providers (the “**2017 NMR Notification**”).
3. As a result of the determination of BT’s SMP in wholesale call termination and wholesale call origination markets, Ofcom decided also to set SMP conditions in relation to BT’s Interconnect Circuits, as set out in Schedule 1 to the 2017 NMR Notification.
4. On 11 April 2019, Ofcom published a consultation entitled “*First consultation: Future of interconnection and call termination*”.
5. On 8 February 2020, Ofcom published a consultation document entitled “*Promoting competition and investment in fibre networks: BT Regulatory Financial Reporting requirements covering wholesale fixed telecoms markets 2021-2026*” (the “**BT Regulatory Financial Reporting Requirements consultation**”). In that document, having reviewed BT’s reporting requirements, Ofcom consulted on proposals to set SMP conditions with respect to BT’s regulatory accounting in connection with SMP determinations proposed in Ofcom’s consultation “*Promoting competition and investment in fibre networks: Wholesale Fixed Telecoms Market Review 2021-2026*”, published on 8 January 2020.
6. On 16 July 2020, Ofcom published a consultation entitled “*Hull Area: Wholesale Fixed Telecoms Market Review 2020*” (the “**Hull Market Review consultation**”). The Hull Market Review consultation included a notification published under section 48A and 80A of the Act in which Ofcom proposed the revocation of SMP conditions in relation to wholesale call origination and Interconnect Circuits (subject to certain specified savings) applying to KCOM.
7. Ofcom is today publishing a consultation document entitled “*Wholesale Voice Services Market Review 2021-2026*” (the “**Consultation**”). In this document, among other proposals, Ofcom is consulting on new proposals to identify markets, make market power determinations and set and revoke SMP conditions applying to BT and specified communications providers in relation to wholesale call termination.

Proposals for market identifications and market power determinations

8. Ofcom is proposing to identify 213 separate markets in the United Kingdom for wholesale call termination services which are provided by BT and each of the 212 persons named in the Annex to Schedule 2 to this Notification (“CP”) to another communications provider, for the termination of voice calls to geographic numbers in each area served by BT and the CP respectively (each a “WCT market”).
9. Ofcom is proposing to make a market power determination that BT and each of the persons set out in the Annex to Schedule 2 to this Notification has significant market power in relation to the WCT market in which that person operates.
10. For BT and each of the persons identified in the Annex to Schedule 2 to this Notification, the proposed SMP designation is to hold with respect to the registered company identified and any of its subsidiaries or holding companies, or any subsidiary of such holding companies, all as defined by section 1159 of the Companies Act 2006, in so far as they operate on the relevant market.
11. The effect of, and Ofcom’s reasons for making, the proposals for identifying the markets and making the market power determinations referred to above are set out in the Consultation.

Proposals to set and apply SMP services conditions

12. Ofcom is proposing to set the following SMP conditions:
 - a) on BT, SMP conditions 1, 2, 3A, 3B, 3C, 4, 5, 6, 7 and 8 as set out in Schedule 1 to this Notification to the extent set out in such Schedule;
 - b) on each of the persons listed in the Annex to Schedule 2 to this Notification, SMP conditions 1, 2A and 2B to the extent set out in that Schedule.
13. As a result of Ofcom’s proposed determination of BT’s SMP in the WCT market in which it operates and BT’s planned migration of its services to IP technology, the SMP conditions which Ofcom is proposing to apply to BT include specific conditions in relation to the interconnection services it provides for the purpose of giving access to wholesale call termination, as set out in Schedule 1 to this Notification.
14. Ofcom is proposing that the SMP conditions shall apply, in the case of each person on whom they are set, in respect of the WCT market on which that person operates.
15. Unless otherwise stated, Ofcom is proposing that the SMP conditions shall take effect from [*the date of any notification under sections 48(1) and 79(4) of the Act*] or such other date specified in any notification under sections 48(1) and 79(4) of the Act adopting the proposals set out in this Notification and shall have effect until the publication of a notification under section 48(1) of the Act revoking such conditions.
16. The effect of, and Ofcom’s reasons for making, the proposals in relation to SMP conditions referred to in this Notification are set out in the Consultation.

Proposals to revoke SMP services conditions

17. With effect from [*the date of the notification published under sections 48(1) and 79(4) of the Act*] or such other date specified in any notification under sections 48(1) and 79(4) of the Act, Ofcom is (to the extent still extant) proposing to revoke:
- a) the SMP conditions applied in Schedule 1 of the 2017 NMR Notification to BT, in Schedule 2 of the 2017 NMR Notification to KCOM and in Schedule 3 of the 2017 NMR Notification to each of the 283 communications providers named in the Annex to such Schedule, in each case in so far as they apply to the markets in the United Kingdom for wholesale call termination services;
 - b) the SMP conditions applied to BT in Schedule 1 of the 2017 NMR Notification in so far as it applies to wholesale call origination on a fixed narrowband network in the United Kingdom excluding the Hull Area;
 - c) the SMP conditions applied to BT in Schedule 1 of the 2017 NMR Notification in so far as it applies to Interconnect Circuits.
18. It is proposed that section 16 of the Interpretation Act 1978 shall apply as if these revocations were a repeal of an enactment by an Act of Parliament.

Ofcom's duties and legal tests

19. The effect of, and Ofcom's reasons for making, the proposals for identifying the markets, making the market power determinations and determinations in relation to SMP conditions referred to in this Notification are set out in the Consultation.
20. In identifying and analysing the markets referred to in this Notification, and in considering whether to make the corresponding proposals set out in this Notification, Ofcom has, in accordance with section 79 of the Act, taken due account of all applicable guidelines and recommendations which have been issued or made by the European Commission in pursuance of an EU instrument, and which relate to market identification and analysis or the determination of what constitutes SMP.
21. Ofcom considers that the proposed SMP conditions set out in the Schedules to this Notification comply with the requirements of sections 45 to 47, 87 and 88 of the Act, as appropriate and relevant to each such SMP condition, and further that the proposed revocations of the SMP conditions referred to above comply with the requirements of sections 45 to 47, 87 and 88 of the Act as appropriate and relevant to them.
22. In making all of the proposals referred to in this Notification, Ofcom has considered and acted in accordance with its general duties set out in section 3 of the Act and the five requirements in section 4 of the Act, as it will apply when the amendments in Part 1 of Schedule 1 to the Electronic Communications and Wireless Telegraphy (Amendment etc) (EU Exit) Regulations 2019 come into force. In accordance with section 4A of the Act, Ofcom has also taken due account of all applicable recommendations issued by the European Commission under Article 19(1) of the Framework Directive.

23. Ofcom has also had regard to the Statement of Strategic Priorities in making the proposals referred to in this Notification.

Making representations

24. Representations may be made to Ofcom about any of the proposals set out in this Notification and the accompanying Consultation by no later than 8 October 2020.

Condition 3C- Interconnect circuits charge control

3C.1 Interconnection The Dominant Provider must take all reasonable steps to secure that, at the end of each Relevant Period, the Percentage Change, C_t , (as determined in accordance with Condition 3C.2) in the aggregate of Charges for all of the services listed in the Annex to this Condition 3C (all such services together referred to as the “Basket”) is not more than the Controlling Percentage, CP_t , (as determined in accordance with Condition 3C.3, or Condition 3C.6 if the circumstances in Condition 3C.4 or 3C.5 prevail).

3C.2 Interconnection The Percentage Change for the purpose of the Basket specified in Condition 3C.1 shall be calculated by employing the following formula:

$$C_t = \frac{\sum_{i=1}^n \left[R_i \frac{(\bar{p}_{i,t} - \bar{p}_{i,t-1})}{\bar{p}_{i,t-1}} \right]}{\sum_{i=1}^n R_i}$$

Where:

C_t is the Percentage Change in the aggregate of charges for the services in the Basket for Relevant Period t ;

n is the number of services in the Basket;

i is a number from 1 to n for each of the n services in the Basket;

R_i is the External Revenue accrued during the Prior Financial Year in respect of service, i ;

t , refers to the Relevant Period;

$t-1$, refers to the Prior Period;

$\bar{p}_{i,t}$ is the Relevant Period Weighted Average Charge made by the Dominant Provider for service, i :

Where such Relevant Period Weighted Average Charge shall be calculated by employing the following formula:

$$\bar{p}_{i,t} = \sum_{j=1}^m (w_{i,j,t} p_{i,j,t})$$

Where:

m is the number of time periods for which there are distinct Charges during the Relevant Period;

j is a number from 1 to m for each of the m time periods during which a Charge is in effect;

$w_{i,j,t}$ is the proportion of the Relevant Period in which each charge, $p_{i,j,t}$, is in effect, calculated by the number of days during which the charge is in effect and dividing

- (1) for the First Relevant Period, by 365;
- (2) for the Second Relevant Period, by 365;
- (3) for the Third Relevant Period, by 366; and
- (4) for the Fourth Relevant Period, by 365.

$p_{i,j,t}$ is the Charge for the specified time period, j , during the Relevant Period t , for the specific service, i ;

$\bar{p}_{i,t-1}$ is the Prior Period Weighted Average Charge made by the Dominant Provider for service, i ;

Where such Prior Period Weighted Average Charge shall be calculated by employing the following formula:

$$\bar{p}_{i,t-1} = \sum_{j=1}^m (w_{i,j,t-1} p_{i,j,t-1})$$

Where:

m is the number of time periods for which there are distinct charges during the Prior Period;

j is a number from 1 to m for each of the m time periods during which a Charge is in effect;

$w_{i,j,t-1}$ is the proportion of the Prior Period in which each charge, $p_{i,j,t-1}$, is in effect, calculated by the number of days during which the charge is in effect and dividing:

- (1) for the First Prior Period, by 365;
- (2) for the Second Prior Period, by 365;
- (3) the Third Prior Period, by 365;
- (4) the Fourth Prior Period by, by 366.

and

$p_{i,j,t-1}$ is the charge for the specified time period, j , during the Prior Period, $t-1$, for the specific service, i ;

3C.3 Interconnection Subject to Conditions 3C.4, 3C.5 and 3C.6, the Controlling Percentage, CP_t , in relation to any Relevant Period is $CPI+0\%$.

3C.4 Interconnection Where the Percentage Change in either the First Relevant Period or the Second Relevant Period or the Third Relevant Period is less than the Controlling Percentage (the "Deficiency"), then the Controlling Percentage for the following Relevant Period shall be determined in accordance with Condition 3C.6.

3C.5 Interconnection Where the Percentage Change in either the First Relevant Period or the Second Relevant Period or the Third Relevant Period is more than the Controlling Percentage (the "Excess"), then the Controlling Percentage for the following Relevant Period shall also be determined in accordance with Condition 3C.6.

3C.6 Interconnection In the case of Deficiency (defined in Condition 3C.4 above) or Excess (defined in Condition 3C.5 above), the Controlling Percentage will be calculated by employing the following formula:

$$CP_t = [(100\% + CPI + X)(100\% + CP_{t-1}) / (100\% + C_{t-1})] - 100\%$$

Where:

CP_t is the Controlling Percentage for the Second Relevant Period (in case of Deficiency or Excess in the First Relevant Period) or for the Third Relevant Period (in case of Deficiency or Excess in the Second Relevant Period) or for the Fourth Relevant Period (in case of Deficiency or Excess in the Third Relevant Period);

In the 2013 Statement, Ofcom imposed certain SMP conditions on BT in relation to interconnect circuits. Ofcom also made a direction, set out in Annex 4 to the 2013 Statement, which listed the information that BT was required to publish for the purposes of securing transparency as to the quality of service in respect of interconnect circuits (“**the 2013 Quality of Service Direction**”).

Attribution rules applied to Wholesale Current Costs

BT must publish a schedule showing the attribution rules applied to each of the Openreach and Rest of BT operating cost categories published in the Attribution of Wholesale Current Cost schedule.

For each cost category information on the following types of attribution rules should be provided, alongside a brief description of the attribution rule:

- **Direct to Openreach services.** E.g. SLG payments could be directly associated with particular services or groups of services.
- **Direct to rest of BT.** This would capture costs that are directly allocated to residual markets or services outside of Openreach.
- **Pay driver.** A separate row must be provided for each pay driver used (e.g. Openreach Pay, BT Group Pay, Technology Pay, BT Group Factorised pay).
- **PAC driver.** A separate row must be provided for each PAC driver (e.g. Openreach PAC, Group PAC and Technology PAC).
- Additional rows for any attribution rule applied to 10% or more of the relevant cost category.

For each attribution rule the schedule should show:

- the amount of operating cost attributed;
- the proportion of total operating cost attributed; and
- the percentage of costs that are attributed to Openreach SMP markets.

Attribution diagrams for Wholesale Current Cost Mean Capital Employed

For each asset reported in the Attribution of Wholesale Mean Capital Employed schedule BT must publish a diagram showing the principal cost pools used in the Regulatory Accounting System alongside a description of the basis of allocation and the associated allocation percentages. These diagrams can be published as an appendix to the RFS.

Market Summaries

BT must publish the schedules set out in this section:

- i. PI Summary with Note on network adjustments above and below the financial Limit;
- ii. Wholesale Local Access – Area 2 Summary;
- iii. Wholesale Local Access – Area 3 Summary with Note on FTTP rollout in Area 3 and associated mark-up;

In each schedule, with agreement from Ofcom, BT can include additional rows i) where required to ensure total revenues or costs reconcile to the Performance Summary by Market schedule or ii) where these row items would be better presented in the Market Summary schedules than in the Reconciliation Statements. For example, in relation to IFRS15 (relating to revenue from contracts with customers) BT could include rows such as.:

- IFRS15 Deferred Revenue
- IFRS15 Outpayments required to be treated as a credit to revenue

Ofcom is proposing to identify 78 separate markets in relation to wholesale mobile voice call termination services that are provided by each of the 78 persons named in Schedule 1 to this Notification to another communications provider, for the termination of voice calls to mobile numbers allocated to that person by Ofcom in the area served by that person and for which that person is able to set the call termination charge (each a “**wholesale mobile voice call termination market**”).
6. Ofcom is proposing to make a market power determination that each of the persons set out in Schedule 1 to this Notification has significant market power in relation to the wholesale mobile voice call termination market in which that person operates.
7. Ofcom is proposing to identify 118 separate markets in relation to wholesale 070 call termination services that are provided by each of the 118 persons named in Schedule 2 to this Notification to another communications provider, for the termination of voice calls to 070 numbers within the number range which has been allocated to that person by Ofcom, for which

that person is able to set the call termination rate (each a “**wholesale 070 call termination market**”).

8. Ofcom is proposing to make a market power determination that each of the persons set out in Schedule 2 to this Notification has significant market power in relation to the wholesale 070 call termination market in which that person operates.
