Question 1: Do you have any comments on Ofcom's proposed Plan of Work 2024/25?	Confidential? – N Lacuna Space thanks Ofcom for the opportunity to participate in its proposed Plan of Work 2024/25 consultation. As recognized by Ofcom in this proposed Plan of Work, over the past years the telecommunications and technology sector has developed at an accelerating rate. Lacuna Space recognizes the key role that Ofcom has played over its 20 years in creating a regulatory framework that fosters innovation and an effective use of the available spectrum. Innovation in spectrum sharing and in mitigation techniques has facilitated the increased usage of Short-Range Devices (SRD) bands, specifically the 862-870 MHz frequency range in Europe. The SRD applications and solutions offered by Lacuna Space address the lack of connectivity in regions where there is no proper terrestrial SRD infrastructure. Therefore, said solutions have the potential to be used in industries fundamental to the UK economic and sustainable development such as: • Farming • Forestry and environmental monitoring • Utility distribution • Quantity measurement As a UK company founded in 2016 that thrives towards enabling wireless services in the wider economy through its unique Low-Power LoRaWAN remote IoT solutions, Lacuna Space would like to take this opportunity to kindly ask for a stronger support from Ofcom during the execution of this Plan of Work 2024/25 in order to shape an adequate framework to accommodate SRD-satellite solutions. The support provided by Ofcom is very important for finalising the CEPT regulatory work and for ensuring seamless terrestrial/satellite operations, fostering a world-

	class LPWAN IoT framework, and contributing to the efficiency and reliability of the UK's IoT infrastructure.
	Thank you for your attention to these crucial matters, and kind support in advance. We remain available for further discussions and collaboration as a UK company that strongly aligns with enabling wireless services in the wider economy for a better and more sustainable future.
