

Response From Mr Kulvinder Boparia

I think the 0870 numbers should be phased out or charging brought into line with 01 and 02 number this way they would be adopted into the free local and national call packages being offered. The telecoms market has moved rapidly over the last 10 years and presently 0870 numbers are a revenue earner for those companies using them rather than being of a major benefit for the consumer.

Thanks,

Kulvinder
