

**Response From Ms Katy Emblin**

Hi,

I am totally fed up with the fact that the companies from whom we purchase goods and support financially have the audacity to charge again when there is a problem. How long more are they going to be able to get away with this day light robbery?!!!

The money which is taken by deception from hard working people like myself will cause them problems. What goes around comes around. The balance of life & nature is always present & will destroy those pathways, as they are taken by force. Now that this message is written in words it will resonate, thank you.

Have good day

Katy K S Emblin
