

STV Player EPG accessibility

The STV Central Limited EPG Service, which provided an access platform to non-STV channels, ceased operating on 10 December 2021.

In 2021, STV had two locations where EPG information could be accessed by its audience on the STV Player: the Channels selector page, and the TV Guide.

Its design took into account accessibility and support for ‘native’ access functionalities, such as voice over and magnification.

Channel Selector Page:

Channels page accessibility	Support for Voice over	Highlight or list programme with audio description and signing separately	Page can be magnified. Note: using device options	Select a “high contrast” display
stv.tv	Yes	N/A - no programme information provided	Yes	Support browser option
STV Player app for Android	Yes	N/A - no programme information provided	Yes	No – high contrast by default
STV Player app for iOS	Yes	N/A - no programme information provided	Yes	No – high contrast by default
STV Player app for Fire TV	Yes	N/A - no programme information provided	Yes	No – high contrast by default
STV Player for Apple TV	Yes	N/A - no programme information provided	Yes	No – high contrast by default

TV Guide

STV’s TV Guide includes support for device voice over services.

TV Guide	Support for Voice over	Highlight or list programme with audio description and signing separately	Page can be magnified	Select a “high contrast” display
stv.tv	Yes	No	Yes	Support browser option
STV Player app for Android	Yes	No	Yes	No – high contrast by default
STV Player app for iOS	Yes	No	Yes	No – high contrast by default
